

# **Official Notice for Nolin RECC Members**

## ***Community Solar Tariff Notice of Filing***

On January 31, 2017, Nolin Rural Electric Cooperative Corporation (Nolin RECC) filed a Community Solar Tariff. Under the Community Solar Tariff, Nolin RECC's members will be able to voluntarily license solar panels within East Kentucky Power Cooperative, Inc.'s (EKPC) eight and a half (8.5) MW community solar facility on the premises of EKPC's headquarters in Clark County, Kentucky (Project). Under the Community Solar Tariff each participating member will effectively pay the initial capital cost of the Project through a onetime, \$460 license fee for each licensed panel. A participating member may offset up to one hundred percent (100%) of his or her average annual consumption of electricity from the previous three (3) years. Participating retail members will receive a monthly credit on their electric bill which will return the value of their licensed solar generation capacity as well as the value of the generated energy associated with said capacity. Depending upon the member's preference, they may also receive the value of the solar renewable energy credits (SRECs) associated with their licensed panel(s). A monthly operations and maintenance expense debit will be deducted from the sum of the credits listed above. The average effect upon a participating member's average bill will vary depending on the member's usage patterns and the pricing applicable to the Project capacity, energy and SRECs during a billing period.

This is a new service offered by Nolin RECC, is strictly voluntary and open to all retail member classes. There currently is no other Nolin RECC tariff in effect for community solar. The proposed effective date for the Community Solar Tariff will be March 2, 2017.
