### **SELECTIVE TREE REMOVAL PROGRAM**

Nolin RECC routinely trims trees throughout its service area that are near overhead primary lines or pad mounted underground equipment. Tree trimming is temporary and expensive, therefore removal of undesirable trees that are considered to potentially cause power outages is an important part of Nolin RECC's overall tree maintenance program. Right of Way/Easement maintenance and tree removal eliminates hazardous conditions, improves access to facilities, and reduces future cost and potential outages. Selected undesirable trees will be pursued whenever possible and Target Trees will be inspected and discussed with property owner by an authorized Nolin RECC representative on a case-by-case basis. Nolin RECC obtains the right in determining which tree/trees or other vegetation falls under the category of the Selective Tree Removal Program.

### **SELECTIVE TREE REMOVAL PROGRAM CANDIDATES**

Trees located at homes, schools, parks, businesses, or other areas, which children may climb easily that are near overhead conductors.

Fast growing trees that interfere with overhead conductors.

Trees that require extensive trimming.

Trees, bushes, and or shrubs that are NOT of the volunteer nature that impede access to pad mounted underground equipment.

### **SELECTIVE TREE REMOVAL PROGRAM GUIDELINES**

Only trees removed under the authority of Nolin RECC qualify for replacement or stump removal.

Only limbs/branches will be discarded (chipped) by Nolin RECC, all other wood will remain and will be the sole responsibility of the property owner.

Stump removal will NOT be provided if property owner decides to replace tree with tree from designated nursery.

Nolin RECC agrees to pay directly to the designated nursery the actual cost this tree/shrub upon receipt of a statement from designated nursery for the tree/shrub (with a 3-tree limit) (with a 6-shrub limit).

Tree/Shrub replacement must take place within 1 year from removal of tree or shrubs causing interference.

Property owner must present signed document/form to the designated nursery as proof of approval for Tree/Shrub replacement.

The delivery and planting of Tree/Shrub will be scheduled by the designated nursery.

The selection shall be the sole responsibility of the property owner and there will be NO exceptions or substitutes to provided list Trees/Shrubs on Selective Tree Removal Form.

Site of new tree/trees to be planted will be discussed and marked with both property owner and Nolin RECC representative. All replacement tree/trees planted outside these discussions will be removed from easement.

## NOLIN RECC Selective Tree/ Shrub Removal List:

### ORNAMENTAL TREES:

<u>Name:</u>	<u>Mature Size:</u>	<u>Starting Size:</u>
