Tax exemption

Plug and cord safety

## Act Now to Claim Your Sales Tax Exemption

### Nolin members need to take action.

To help Nolin RECC members navigate recent changes to sales tax laws, Kentucky's electric cooperatives are launching a public awareness campaign. In the 2022 legislative session, Kentucky lawmakers enacted a change to sales tax laws.

Beginning January 1, 2023, only a person's "domicile" (primary residence) will be exempt from sales tax on utility services, including electric bills.

Nolin RECC is one of 26 electric cooperatives in Kentucky who work together to advocate for electric consumers. These efforts have helped protect the longstanding sales tax exemption for residential energy bills.

Though this sales tax exemption remains in place for electric use at a primary residence, Kentucky will begin imposing a sales tax on other properties as of January 1, 2023.

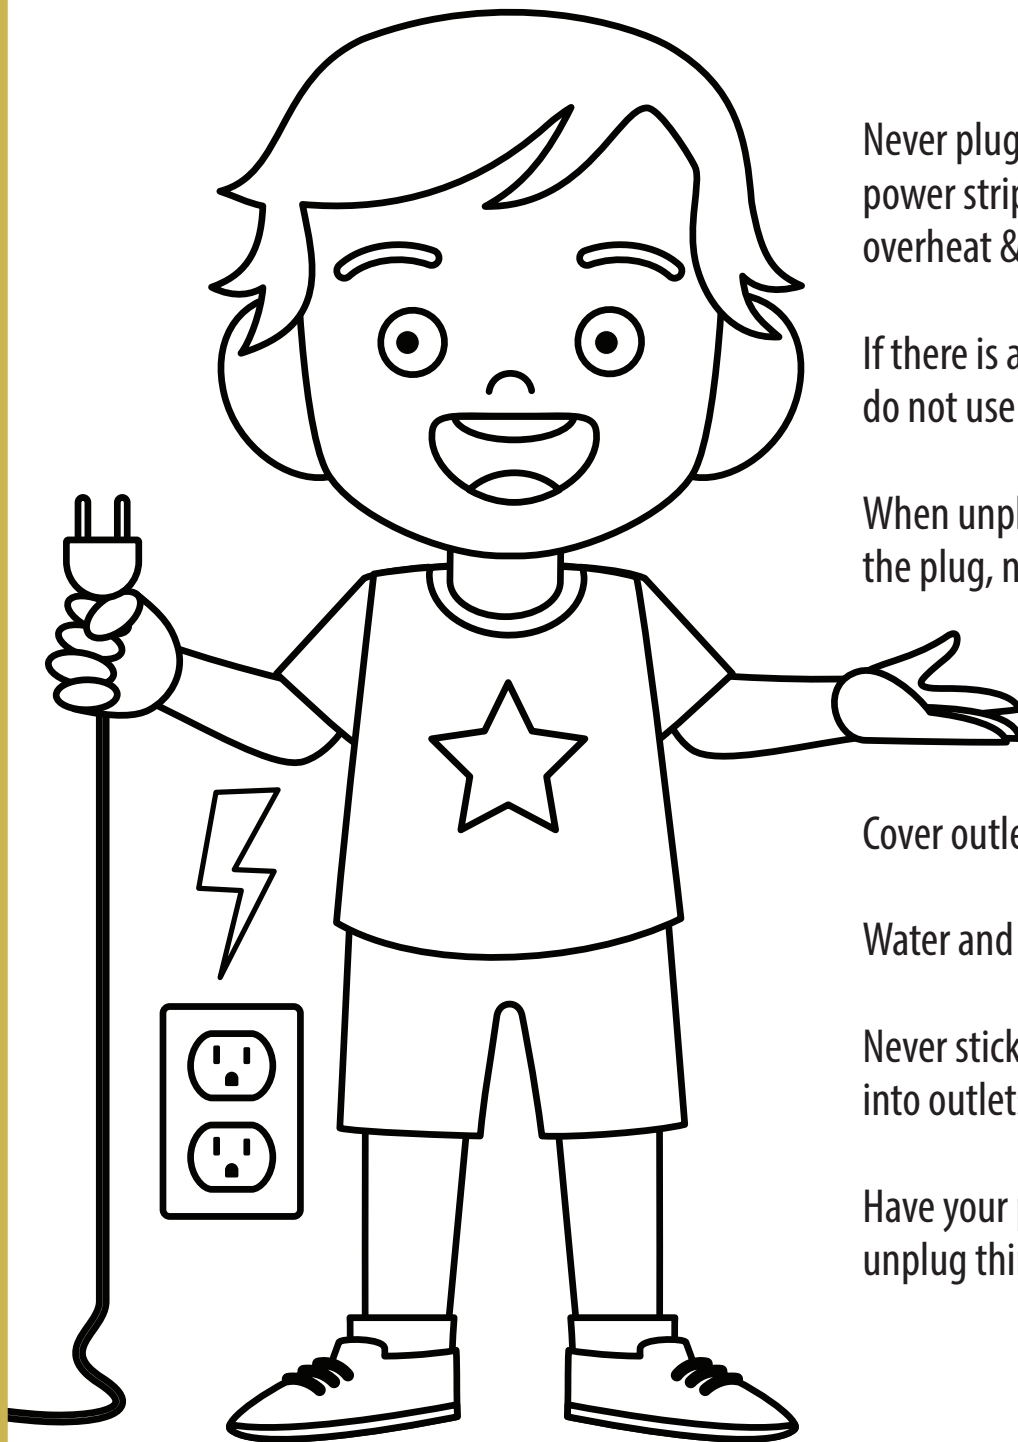

To make sure the sales tax is not mistakenly applied to the electric bill of your primary residence, Nolin RECC members need to take action. Members who have a residential meter or meters in their name need to declare which meter or meters is/are associated with their primary residence.

Find more details and an exemption form at [www.nolinrecc.com](http://www.nolinrecc.com).

## PLUG & CORD SAFETY

Never plug too many cords into power strips because they can overheat & cause a fire.

If there is a cord with frayed wiring, do not use it.

When unplugging something, grip the plug, not the cord.

Cover outlets that are not in use.

Water and electricity don't mix!

Never stick fingers or objects into outlets.

Have your parents plug and unplug things for you.
